## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 52

[FRL 1559-71]

#### Approval and Promulgation of Implementation Plans, Alabama: Revision of Emergency Episode Plan and Oxidant Alert Level

**AGENCY:** Environmental Protection Agency.

**ACTION:** Final rule.

**SUMMARY:** EPA today is approving the changes in the Alabama State Implementation Plan (SIP) which (1) updates the emergency episode procedures, and (2) raises the level of the Alert Stage in the emergency episode procedures to 0.15 ppm for ozone, which will be consistent with the revised National Ambient Air Quality Standard of 0.12 ppm.

**DATES:** This action is effective September 10, 1980.

**ADDRESSES:** Copies of the submittal may be examined during normal business hours at the following EPA offices:

Public Information Reference Unit,  
Library Systems Branch,  
Environmental Protection Agency, 401  
M Street SW., Washington, D.C.  
20460.

Library, Environmental Protection  
Agency, Region IV, 345 Courtland  
Street NE., Atlanta, Georgia 30365.

In addition, the Alabama revisions may be examined at the offices of the Division of Air Pollution Control, Alabama Air Pollution Control Commission, 645 South McDonough Street, Montgomery, Alabama 36104.

**FOR FURTHER INFORMATION CONTACT:** Mr. Jerry Preston, Air Programs Branch, EPA Region IV, 345 Courtland Street NE., Atlanta, Georgia 30365, 404/881-3286 or FTS 257-3286.

**SUPPLEMENTARY INFORMATION:** On August 23, 1979, EPA asked the State of Alabama to update its emergency episode procedures to reflect changes in

monitoring methods, persons to be contacted, likely episode locations, and accidental spill guidelines. On January 11, 1980, the State submitted the final version of the plan revision complying with EPA's request. In addition, the State raised the alert level of ozone from 0.10 ppm to 0.15 ppm, a fifty percent increase, to be consistent with a corresponding increase in the National Ambient Air Quality Standard promulgated by EPA on February 8, 1979 (44 FR 8202). EPA published in the Federal Register on March 25, 1980, a proposal to approve the revision and solicited public comment on it. No comments were received.

#### Final Action

Based on the above information, EPA is approving the changes to the Alabama plan as being consistent with requirements of the Clean Air Act and Federal regulations promulgated thereunder.

(Section 110 of the Clean Air Act (42 U.S.C. 7410))

Dated: August 5, 1980.

Douglas M. Costle,  
Administrator.

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

#### Subpart B—Alabama

In § 52.50, paragraph (c) is amended by adding subparagraph (25) as follows:

##### § 52.50 Identification of plan.

\* \* \* \* \*

(c) The plan revisions listed below were submitted on the dates specified.

\* \* \* \* \*

(25) Revised emergency episode control plan, updating procedures and raising the alert level for ozone from 0.10 ppm to 0.15 ppm, submitted by the Alabama Air Pollution Control Commission on January 11, 1980.

### 40 CFR Part 52

[FRL 1558-5]

#### Approval and Promulgation of Implementation Plans; California State Implementation Plan Revision: Six Administrative Chapters

**AGENCY:** Environmental Protection Agency.

**ACTION:** Final rulemaking.

**SUMMARY:** The Environmental Protection Agency (EPA) takes final action to approve six administrative chapters of

the California State Implementation Plan (SIP) submitted by the Governor's designee. These chapters address the legal authorities of the State and the local Air Pollution Control Districts, present an overall statewide perspective on air quality, and outline specific State programs dealing with emission source compliance procedures, surveillance of emission sources, resources to implement the SIP, and intergovernmental relations. The intended effect of this action is to update the SIP.

**EFFECTIVE DATE:** September 10, 1980.

#### FOR FURTHER INFORMATION CONTACT:

Louise P. Giersch, Director, Air and Hazardous Materials Division, Environmental Protection Agency, 215 Fremont Street, San Francisco, CA 94105, Attn: Douglas Grano, (415) 550-2938.

**SUPPLEMENTARY INFORMATION:** On May 21, 1979 (44 FR 29497) and July 3, 1979 (44 FR 38912), EPA published Notices of Proposed Rulemaking for six Administrative Chapters submitted on December 29, 1978 and March 16 and 29, 1979 by the California Air Resources Board for inclusion in the California SIP. The Chapters are entitled as follows:

Chapter 2—Statewide Perspective  
Chapter 3—Legal Authority  
Chapter 20—Compliance  
Chapter 23—Source Surveillance  
Chapter 24—Resources  
Chapter 25—Intergovernmental Relations

Under Section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove regulations submitted as SIP revisions. All six chapters were evaluated in accordance with 40 CFR Part 51 and found to be consistent with EPA requirements. The Notices of Proposed Rulemaking proposed to approve these six chapters and provided 30-day public comment periods. No comments were received. Therefore, this notice takes final action to approve the revisions contained in the December 29, 1978, and March 16 and 29, 1979 submittals, and incorporate them into the California SIP.

EPA has determined that this action is "specialized" and therefore, not subject to the procedural requirements of Executive Order 12044.

The Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Sections 110 and 301(a) of the Clean Air Act as amended (42 U.S.C. §§ 7410 and 7601(a)))

Dated: August 5, 1980.

Douglas M. Costle,  
Administrator.

Subpart F of Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

#### Subpart F—California

1. Section 52.220 is amended by adding paragraphs (c)(46), (48), and (49) as follows:

##### § 52.220 Identification of plan.

\* \* \* \* \*

(c) \* \* \*

(46) The following Administrative Chapters of the California SIP, submitted on December 29, 1978, by the Governor's designee.

- (i) Chapter 2—Statewide Perspective.
- (ii) Chapter 20—Compliance.
- (iii) Chapter 23—Source Surveillance.
- (iv) Chapter 24—Resources.
- (v) Chapter 25—Intergovernmental Relations.

\* \* \* \* \*

(48) Chapter 3—Legal Authority of the California SIP, submitted on March 16, 1979, by the Governor's designee.

(49) Addendum to Chapter 23 of the California SIP submitted on March 29, 1979, by the Governor's designee.

\* \* \* \* \*

[FRL 1554-6]

#### State and Federal Administration Orders Revising the Michigan State Implementation Plan

**AGENCY:** U.S. Environmental Protection Agency.

**ACTION:** Final rulemaking.

**SUMMARY:** U.S. Environmental Protection Agency (USEPA) approves the Michigan Air Pollution Control Commission's (Commission's) request for a revision to the Michigan State Implementation Plan (SIP). The revision is a Final Order issued by the Commission. The Final Order was the result of the Stipulation and Consent Order entered into by the Dundee Cement Company and the Air Quality Division of the Michigan Department of Natural Resources. The order provides for a final compliance date of December 31, 1983 for reducing the particulate matter emissions to 0.20 pounds per 1,000 pounds of exhaust gases at the Dundee Cement Company located near Dundee in Monroe County, Michigan.

Any Order which has been issued to a major source and extends the SIP compliance date for meeting the particulate emission limitations must be approved by USEPA before it becomes effective as a SIP revision under the Clean Air Act (CAA), 42 U.S.C. Section 7410.

**EFFECTIVE DATE:** This final rulemaking becomes effective on August 11, 1980.

**ADDRESSES:** Copies of the SIP revision and USEPA's evaluation of the revision are available for inspection at the following addresses:

United States Environmental Protection Agency, Air Programs Branch Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

United States Environmental Protection Agency, Public Information Reference Unit, 401 M Street SW., Washington, D.C. 20460.

#### FOR FURTHER INFORMATION CONTACT:

Toni Lesser, Regulatory Analysis Section, Air Programs Branch, United States Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886-6037.

**SUPPLEMENTARY INFORMATION:** The Dundee Cement plant is located in a particulate attainment area, as designated by USEPA in the October 5, 1978 Federal Register (45 FR 45993). The nearest primary particulate nonattainment areas are approximately 35 km northeast and south of the plant, and the closest secondary particulate nonattainment area is approximately 6 km east.

The Dundee Cement Company operates two 1,600 ton per day (each) wet process rotary cement kilns and related cement manufacturing process equipment. From the time the plant was built in 1959, the particulate emissions from the rotary kilns have been controlled by an electrostatic precipitator. The original precipitator unit operated at approximately 97.5 percent efficiency. Particulate emissions were about seven times greater than the Commission's limit. Despite various changes and upgrading efforts, the precipitators have not attained consistent satisfactory performance.

On October 26, 1979 the State of Michigan formally submitted a State Implementation Plan revision for particulate matter and visible emissions for the Dundee Cement Company in Monroe County, Michigan. The Order extends the compliance date until December 31, 1983 for the Dundee Cement Company to meet the particulate and visible emission limitations in the Michigan SIP.

The Commission's rules, R336.41 and 336.44 (Rules 336.1301 and R 336.1331 as

of January 18, 1980), set forth the visible emission and particulate matter emission limitations for cement kilns in the State of Michigan. Presently, particulate matter emissions from the Dundee Cement Company's cement kiln stack are in excess of the allowable limit of 0.2 lb. total suspended particulates (TSP) per/1000 lbs. of exhaust gases set by the Commission.

The SIP revision provides for final compliance with the allowable limit of 0.2 lb. of particulate per 1,000 pounds of exhaust gases by December 31, 1983 and establishes an interim emission limitation of 0.65 lb. TSP/1000 lb. of exhaust gases.

An air quality analysis was performed to assess the contribution of particulate emissions from the Dundee Cement plant to measured exceedences of the 24-hour particulate standard. The analysis was based on maximum plant operating conditions for both the interim and final particulate emission limitation conditions. From the results of the air quality analyses, it was concluded that the operation of the Dundee Cement Plant under either the interim (0.65 lb. TSP/1000 lb. exhaust gas) or the final (0.2 lb. TSP/1000 exhaust gas) emission limitations will not threaten or prevent the attainment and maintenance of the TSP National Ambient Air Quality Standards (NAAQS) in the plant vicinity, nor contribute significantly to existing violations at nearby primary and secondary particulate nonattainment areas.

USEPA reviewed the Order and the technical support material, and proposed approval of the Order and compliance schedule as a SIP revision on May 7, 1980 (45 FR 30090). In that notice, USEPA proposed approval of the extension of the compliance date to December 31, 1983. In addition, USEPA proposed to approve the schedule for compliance. Interested parties were given until June 6, 1980 to submit written comments. No comments were received. Therefore, USEPA takes final action today to approve this revision to the Michigan SIP.

Final approval of the Order as a SIP revision is effective upon publication (date of publication). The Administrator finds good cause for making this revision effective immediately as the Order is already effective in the State of Michigan and federal approval imposes no additional requirement on the affected source.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this final action is available *only* by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of (date of
